

# MA110 - Mathematical Explorations

## Gallery Walk

### Spring 2014

A gallery walk is a teaching technique where we all get to participate in sharing our views on a number of questions or prompts. My purpose here is for you to share so we can all better understand why each of us is in this course.

1. What are some words you would use to describe mathematics?
2. Why are you taking this class? What do you hope to get out of this course?
3. What are your favorite mathematical topics, if any? (Please be specific.)
4. What do you think mathematicians do?
5. Why might someone become a mathematician?
6. Who are some famous mathematicians?
7. Can you name some contemporary mathematicians? I.e. mathematicians from the 20<sup>th</sup> or 21<sup>st</sup> century?
8. What subjects do you like learning about? (This question is not restricted to just mathematics.)
9. What is worth knowing? (This question is not restricted to just mathematics.)
